Summary

Frontend Engineer with 4+ years of experience building scalable B2B SaaS applications using React and TypeScript. Experienced in designing complex UI systems, optimizing performance, and managing large-scale state in data-intensive applications. Proven track record of delivering end-to-end features with measurable impact, including 40% reduction in manual workflows and 30% increase in user engagement. Strong collaborator across product, design, and backend teams, with a focus on scalable frontend architecture.

Education

Sardar Vallabhbhai National Institute of Technology

Surat

B.Tech/B.E | GPA: 8.3 / 10

07/2017 - 04/2021

Experience

WebEngage

Gurgaon, India

Software Engineer – Frontend

04/2024

B2B SaaS Customer Engagement Platform

- Designed and implemented a WhatsApp Template Auto-Approval system with real-time validation, preview, and approval tracking, reducing manual review effort by 40%
- Designed and owned a Nunjucks-based personalized modal framework enabling dynamic variable parsing and context-aware rendering, increasing user engagement by 30%
- Developed an AI-powered image editor (Image Copilot) using Konva Canvas, accelerating creative workflows by 2x
- Built an AI-powered Email Content Agent using a chat-based interface to generate complete email templates from natural language prompts, integrating brand guidelines and BeeFree editor, improving campaign creation speed and reducing manual effort
- Contributed to a large-scale React/Redux dashboard serving enterprise clients, driving code standardization, leading design-system migration (base revamp), and architecting a centralized entity-based API layer to improve scalability, maintainability, and developer efficiency

Aarti Industries

Vadodara, India

Engineer

09/2021 - 10/2023

- Developed data-driven analytics and negotiation tools using React and Chart.js, contributing to ~20% cost reduction
- Digitized inventory and material issuance workflows using JavaScript and React, improving operational efficiency by 30%
- Collaborated with cross-functional stakeholders to translate complex business requirements into scalable and reusable UI components

Skills

Languages & Web: JavaScript • TypeScript • HTML5 • CSS3

Frontend: React.js • Redux • Redux Toolkit • Ant Design • Konva Canvas

Architecture: Component-Driven Architecture • Scalable UI Systems • REST APIs • Micro-Frontend Concepts

Performance & Tools: Code Splitting • Lazy Loading • Memoization • Webpack • Git • CI/CD

Projects

Vibe Music (Spotify-like Streaming Platform)

<https://vibes-stream.netlify.app/>

- Built a music streaming app using React and Spotify Web API with OAuth 2.0 (PKCE), implementing playback (queue, controls) and real-time state management
- Designed client-side architecture for auth flow, token lifecycle, and optimized data fetching with seamless SPA routing across playlists, albums, and search

Shopping Website

<https://hulkappecommerce.netlify.app/>

- A full-featured **eCommerce app** using **React, Redux Toolkit, JavaScript, HTML5, and CSS3**, supporting **dynamic cart operations**, **real-time price updates** (based on color/size), and **automatic total calculations**.
