SUMMARY

Frontend Engineer with 4+ years of software engineering experience building scalable B2B SaaS and data-intensive web applications using React, JavaScript and TypeScript. Experienced in reusable UI systems, API-driven workflows, large-scale state management, AI-assisted product experiences and performance-focused frontend architecture, with working knowledge of Node.js, Next.js and Python for backend/API development. Delivered end-to-end features with measurable impact including 40% reduction in manual review effort, 30% increase in engagement and 2× faster creative workflows.

EXPERIENCE

WebEngage, *Software Engineer – Frontend* 04/2024 – Present
Gurgaon, India

- Designed and implemented a WhatsApp Template Auto-Approval system with real-time validation, preview and approval tracking, reducing manual review effort by 40%.
- Designed and owned a Nunjucks-based personalization framework for dynamic variable parsing and context-aware rendering, increasing user engagement by 30%.
- Developed an AI-powered Image Copilot using React and Konva Canvas with image generation and editing workflows, accelerating creative execution by 2×.
- Built an AI-powered Email Content Agent using a chat-based interface to generate complete email templates from natural-language prompts, integrating brand guidelines and BeeFree.
- Contributed to a large-scale React/Redux enterprise dashboard, standardizing code, driving design-system/base migration, and architecting a centralized entity-based API layer for scalability and maintainability.

Alendei Platforms Pvt. Ltd., *Software Engineer - API Integration Specialist* 11/2023 – 03/2024
Vadodara, India

- Integrated APIs for a WhatsApp-based campaign platform, translating business requirements into configurable customer engagement workflows.
- Configured campaign flows involving conditions, triggers and messaging logic for targeted customer communication.
- Worked on email campaign workflows and responsive HTML email templates based on customer requirements.
- Troubleshot API integration and campaign-flow issues, collaborating with internal teams to identify root causes and resolve technical problems.

Aarti Industries, *Engineer* 09/2021 – 10/2023
Vadodara, India

- Developed data-driven analytics and negotiation tools using React and Chart.js, contributing to approximately 20% cost reduction.
- Digitized inventory and material-issuance workflows using JavaScript and React, improving operational efficiency by 30%.
- Collaborated with cross-functional stakeholders to translate complex business requirements into scalable, reusable UI components.

EDUCATION

B.Tech/B.E., *Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat* 07/2017 – 04/2021
GPA: 8.3/10

TECHNICAL SKILLS

Languages & Web: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, JSON | **Frontend:** React.js, Next.js, Redux, Redux Toolkit, Ant Design, Konva Canvas, React Hooks | **Backend & APIs:** Node.js, REST APIs, API Integration, HTTP/HTTPS, OAuth 2.0 (PKCE), Async Patterns, GraphQL | **Architecture:** Component-Driven Architecture, Modular UI Systems, Scalable Frontend Architecture, MVC, Micro-Frontend Concepts | **Performance & Tooling:** Code Splitting, Lazy Loading, Memoization, Webpack, Git, CI/CD, Browser DevTools

SELECTED PROJECTS

Vibe Music — Spotify-like Streaming Platform , *React, Spotify Web API, OAuth 2.0 (PKCE)*
Built playback, queue/controls, playlist/album search and SPA routing; designed client-side authentication, token lifecycle and real-time state management.

Shopping Website , *React, Redux Toolkit, JavaScript*
Built eCommerce flows with dynamic cart operations, variant-based pricing and automatic total calculations.
